Cattle Slaughtering

Livestock Slaughtering June 2012

	Cattle	Sheep	Pigs
	'000 head		
June 2011	136.7	224.1	237.2
June 2012	106.5	214.4	234.2
Percentage Change			
June 2012/2011	-22.1%	-4.3%	-1.3%
Jan-Jun 2012/2011	-14.4%	5.1%	6.3%

Cattle slaughtering decreased by 22.1% in June

The number of cattle slaughtered in June 2012 was 22.1% lower than in June 2011. See Table 1 and graph.

A further comparison of June 2012 and June 2011 slaughtering figures also shows that

- ◆ Sheep slaughtering decreased by 4.3%.
- ◆ Pig slaughtering decreased by 1.3%.

The number of cattle slaughtered in January-June 2012 was 14.4% lower than the corresponding 2011 period. Over the same period there was an increase of 5.1% in sheep slaughtering and an increase of 6.3% in pig slaughtering.

Comparing EU figures for the periods January-April 2012 and January-April 2011, Ireland showed a 12.8% decrease in cattle slaughtering while of the major EU cattle producing countries, Germany recorded an increase of 2.5%. During the same period the United Kingdom, Italy and France recorded decreases of 7.8%, 5.5% and 3.2% respectively. See page 4.

Background Notes

Introduction

This release gives the number and carcass weight of cattle, sheep and pig slaughterings in the Republic of Ireland. The figures include slaughterings at both meat establishments approved by the Department of Agriculture, Food and Marine (DAFM) and slaughterhouses and meat plants approved by Local Authorities under S.I.432 of 2009. The collection of monthly slaughtering data for cattle, sheep and pigs is governed by Regulation (EC) No. 1165/2008.

DAFM approved plants

Data on the number of slaughterings in meat establishments approved by DAFM for cattle, sheep and pigs is obtained monthly from the Department of Agriculture, Food and Marine. Average carcass weights of cattle are taken from the Department's Beef Carcass Classification Scheme. Average carcass weights of pigs are based on information obtained directly from the export factories by the CSO. Average carcass weights of sheep are derived through consultations with industry experts.

Local Authorities approved plants

The CSO conducts a monthly survey of all Local Authorities in the State. All slaughterings in slaughterhouses and meat plants approved by Local Authorities under S.I.432 of 2009 are included.

The CSO estimates the carcass weight of cattle, sheep and pigs slaughtered in premises under Local Authority control. These estimates are reviewed on a regular basis with butchers and abattoirs.

Calves

Calf slaughterings are included with cattle.

Carcass weight

For cattle, the carcass weight is defined as the weight of the slaughtered animal's cold body after being skinned, bled and eviscerated and after removal of external genitalia, the limb at the carpus and tarsus, head, tail, kidneys and kidney fats and the udder.

For sheep, the carcass weight is defined as the weight of the slaughtered animal's cold body after being skinned, bled and eviscerated and after removal of the head, feet, tail and genital organs including the udder. Kidneys and kidney fats are included in the carcass.

For pigs, the carcass weight is defined as the weight of the slaughtered animal's cold body either whole or divided in half along the mid-line, after being bled and eviscerated and after the removal of the tongue, bristles, hooves, genitalia, flare fat, kidneys and diaphragm.

Timing of Easter

Easter falls each year on a Sunday between March 22nd and April 25th, inclusively. In 2012 Easter Sunday fell on April 8th, while in 2011 it fell on April 24th. The level of sheep slaughterings in March and April each year is greatly influenced by when Easter falls.

Dates for Easter Sunday

2012 – 8th April

2011 – 24th April

2010 – 4th April
